Evaluation letter of ICREYOU project

Professional Development Activity which worked in different methods to raise the quality of youth work and youth projects by fostering creativity and innovation among youth workers and young leaders.

Activity dates: 02 of January till 10 of January 2026

Activity place: Bolko Osrodek Turystyczny, Area of Klodzko, Poland

We would like to express our sincere appreciation for the successful implementation of the project focused on fostering creativity and innovation among youth workers and young leaders.

The overall aim of the project — to raise the quality of youth work and youth projects by developing young people’s creative skills — was clearly reflected throughout the programme. It resonated strongly with our participants and contributed to a meaningful shift in mindset.

The diverse exposure to different creative methods, combined with space for experimentation and reflection, allowed participants to broaden their perspectives and step outside of their comfort zones. Collaborative activities were particularly impactful, fostering teamwork, peer learning, and collective problem-solving.

From an organisational perspective, we would like to especially highlight the excellent communication and cooperation with partners. Communication was clear, timely, and transparent at all stages of the project. The organising team demonstrated a high level of professionalism, flexibility, and responsiveness, which created a strong sense of trust and partnership.

Furthermore, the genuine care for participants’ well-being and individual needs was shown. Special attention was given to participants with fewer opportunities, ensuring equal access, safe learning conditions, and meaningful participation throughout the project.

Overall, the project contributed to improving the quality of youth work by empowering participants with new creative tools, confidence, and motivation to apply innovative approaches in their local contexts. We highly value this cooperation and would warmly recommend the host organisation as a reliable and committed partner for future Erasmus+ projects.

Katsiaryna Masimenko
